Attention:- Tom Cashen,

I had the opportunity as the project architect to visit the New Zealand Pavilion at Expo 92 in Seville Spain last October.

I must congratulate Argon Construction on the excellent standard of workmanship achieved on the pavilion.

I particularly stress this fact in knowing the difficult working environment that your company had to cope with in Seville where building conditions & regulations are quite different to New Zealand.

Furthermore Argon Construction achieved this excellent result without on site supervision or on site guidance in interpreting the architects detailed drawings.

Your Company's positive attitude towards achieving a well built job on time & on budget is exemplary, well done Argon.

Yours sincerely

P.G.Hill.
